

THE RIDGE Portable Fire Pit

This infused air flow fire pit design offers a better burn and is virtually smoke free.

Innovative fire pit design burns wood pellets or smaller pieces of wood, generating significant heat for the backyard, camping or the beach.

This compact fire pit is easy to carry, set up and clean up. It nests together making it easy to take anywhere.

THE RIDGE PORTABLE FIRE PIT

- Generates significant heat for camping and tailgating
- Easy to assemble, use, carry and store
- Easy clean up, leaving no trace
- Carrying bag included
- Overall Assembled Size: 15" Dia x 12.5"
- Net Weight: 14.8 lb (steel), 11.4 lb (stainless steel)

Fire pit nests together in carrying bag, making it easy to take anywhere

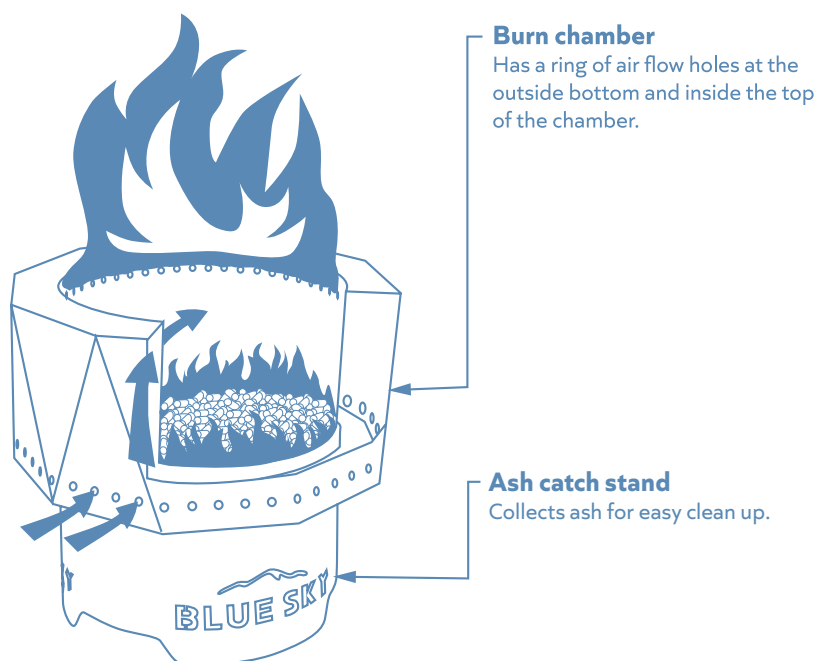

HOW IT WORKS

Outside air is pulled into the bottom ring of holes on the burn chamber and moves through the two piece body up to the inside of the holes.

The heated air is released through the inner ring of the holes into the burn chamber, infusing the burn chamber with an extra boost of oxygen which improves the burn.

This infusion of oxygen increases the heat output and vaporizes virtually all of the wood particles that create smoke.
